

ASSEMBLY INSTRUCTIONS: "POLICE STATION" H.O. Scale

1. Compare the pieces in your kit with the drawing. Make sure you know where each piece fits.
2. Trim off all excess plastic before cementing. Use watery Styrene Cement and a small brush. Apply cement so it won't show on the finished kit.
3. All parts are numbered. Match up the numbers as you assemble your kit.
4. Scrape the paint off the cementing edges on painted parts before glueing.

5. Cement all windows, doors and baseplugs into the wall openings. Match up the numbers.
6. Cement the top and bottom halves of the front wall and right sidewall together. Make sure that they are flat and properly aligned on the edges.
7. Cement the walls to the base and to each other.
8. Cement the roof into place.
9. Fold the chimneys and cement the edges. Then cement the chimneys, chimney caps, air conditioner, two vent pipes and the roof bar to the roof.
10. Cement the gutters, spouts, trimstrips, lamp bases, lamp posts, window bars, doorsteps and flag pole into place.
11. Apply the printed labels as shown on the box cover.
